Further order for INVENTA-FISCHER AG from China

The Engineering Company INVENTA-FISCHER AG (formerly EMS-INVENTA AG) – a member of the EMS-group, active in the field of performance polymers, fine chemicals and engineering – has again secured an important order from China.

This contract – value approx. CHF 35.0 mio. – covers the design and supply of a plant to produce 200'000 tons per year of polyester melt/chips (1 production line), starting from terephthalic acid and ethylene glycol.

INVENTA-FISCHER AG will furnish the technology (continuous polycondensation and license for the high speed spinning process „POY 5000“), perform the engineering work and delegate its specialists for the supervision of the erection work and the commissioning of the plant.

The production plant will be operated by Shandong Zibo Universal New Materials Co., Ltd. at Zibo, Shandong Province. Start of production is scheduled for end 2001.
